

READYMIX CONCRETE

**BEST**  
READYMIX CONCRETE

**A BOND FOREVER...**

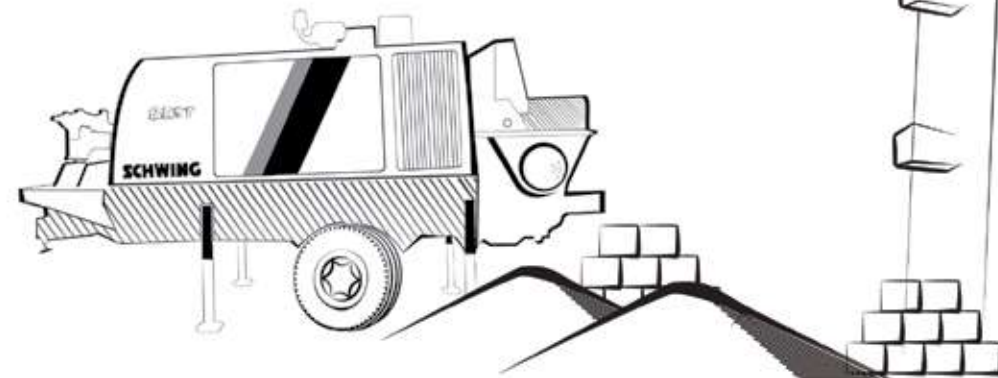

[www.bestreadymix.com](http://www.bestreadymix.com)

## Towards emerging future...

Best Readymix, a division of the leading business house - the Best Group, Thrissur, Kerala is engaged in supplying high quality readymix cement solutions to the diverse needs of the building industry. We produce and supply ready mixed concrete to customers through a network of fixed commercial outlets and project specific onsite batching facilities. Promoted by leading suppliers of raw materials and equipments to the building and construction industry, our extensive experience in Cement C & F, Quarrying, Earth Moving etc. ensures better quality of raw materials to cater to projects ranging in size from the smallest home application to the largest construction projects.

## Professionalism to the core...

Our professional team has the resources and technical expertise to provide a wide range of mixes and match right mix design to the right application and can be supplied to several positions in one delivery. Readymix concrete is cost effective and its speed of discharge onsite is very useful to meet tight construction deadlines. Our own quarry ensures quality gravel and our fully equipped laboratory delivers quality ready mix concrete. Computerized control of the plant also allows different concrete recipes as per your requirements. Automatic Concrete Batching is possible and an aggregate up to 25mm can be delivered through 125mm pipeline.

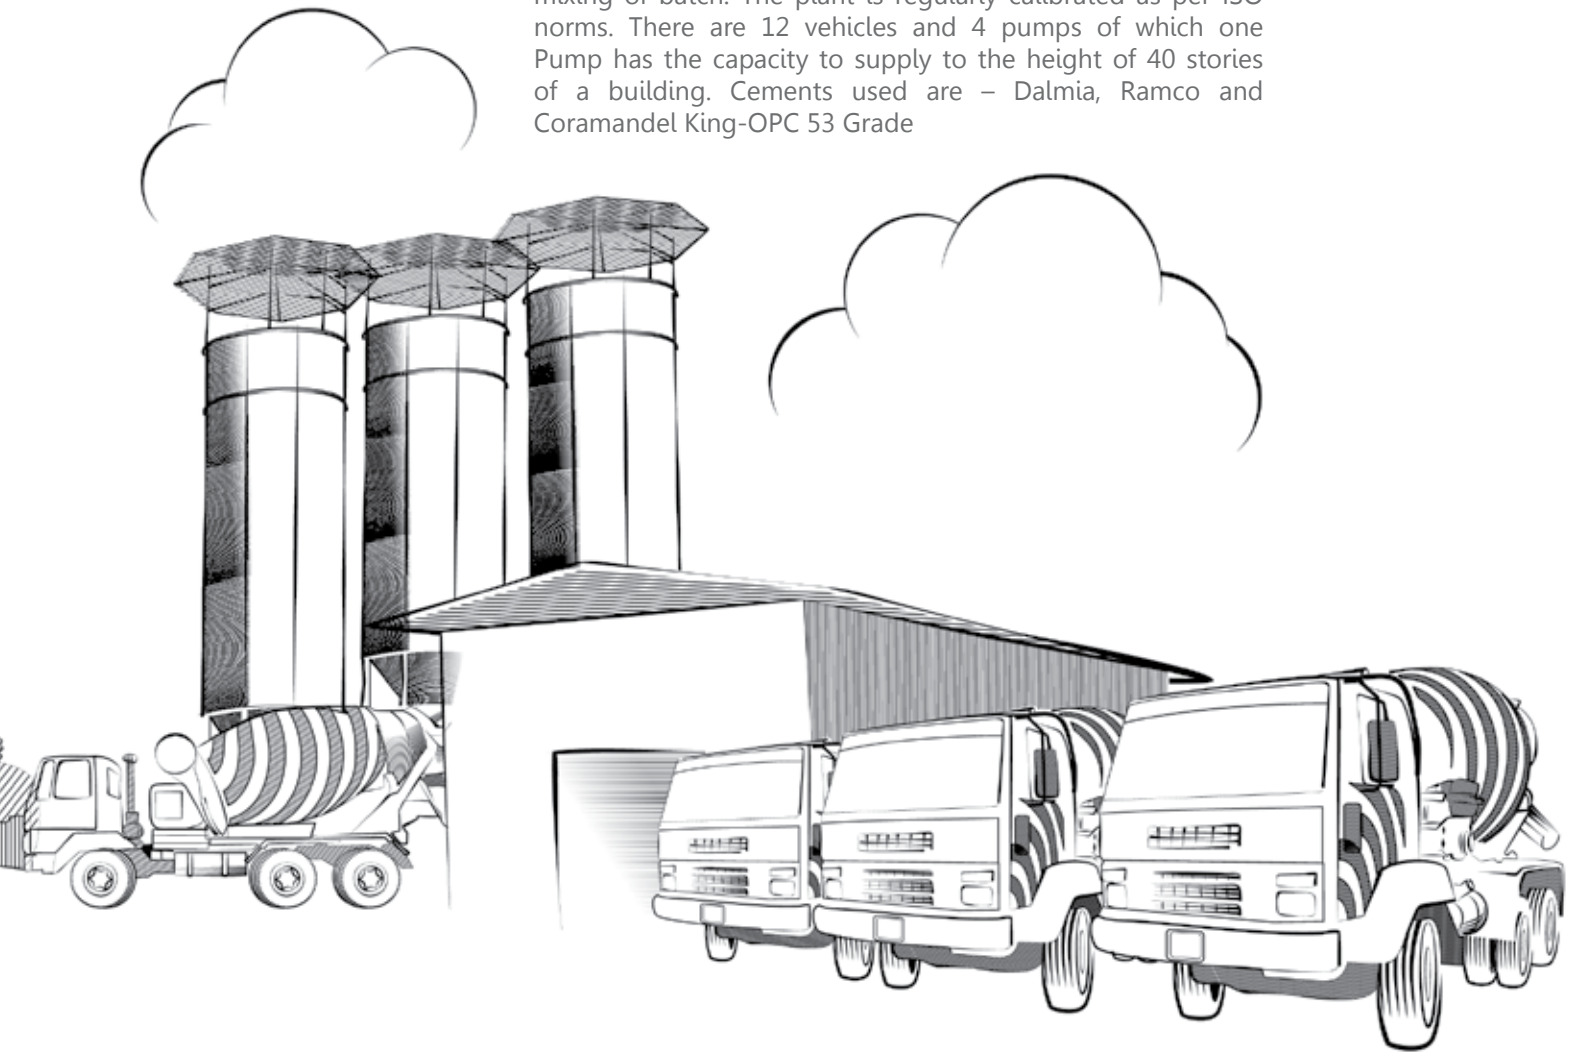

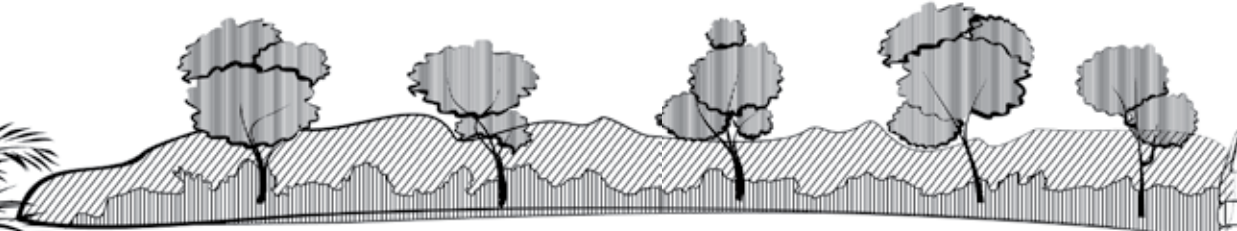

## Committed to quality construction...

Rigorous quality control is carried out throughout the manufacturing process and readymix concrete meets a great variety of needs in terms of technical sophistication, ease of use, assembly and design. Devotion to quality is apparent in the consistency and predictability of Best Readymix products. Best Ready mix meets exacting standards through a series of internal and external checks. Practices and facilities are carefully tested and monitored by professional independent laboratories. Beyond rigorous testing of materials, QA/QC Programs include the meticulous maintenance of facilities and vehicles.

Leading with latest technology...

Best Readymix concrete has association with many renowned companies like Schwing Stetter, the world leader in Readymix machinery which gives them an extra edge. We have fully computerized batching plant with operations for data management and batching functions to store 9,999 mix design recipes and delivery notes which eliminates human errors to guarantee consistent concrete produced batch after batch. A twin shaft mixer, the latest innovation in mixer technology used internationally ensures uniform mixing of batch. The plant is regularly calibrated as per ISO norms. There are 12 vehicles and 4 pumps of which one Pump has the capacity to supply to the height of 40 stories of a building. Cements used are – Dalmia, Ramco and Coramandel King-OPC 53 Grade

## Best Readymix Features

- A fleet of 12 transit mixers with 4 concrete pump facility manufactured by Stetter
- At the construction site, the readymix concrete is placed by pumping with concrete pumps which can pump upto 300m horizontally and 150m vertically (ie. Upto 40 floors), and @ of 35 cum/hr of concrete
- Delivering Readymix concrete to places which are difficult and expensive to deliver
- Assistance for designing concrete mixes
- Technical guidance/site inspection prior to supply
- Testing and quality control
- Technical solution for any construction problem
- Fully automated batching and mixing plant from Stetter Germany with a capacity of 60cum/hour

## Best Readymix Advantages

Better quality | No Labour associated with production of concrete Elimination of Procurement / Hiring of plant and machinery | Noise and dust pollution at site is reduced | Elimination of storage space | Time required is greatly reduced | Wastage of basic material avoided | Organization at site is more streamlined | Computerized ready mix concrete delivered at your doorstep | Consistent quality of concrete | Enhanced service levels | Value for money | Timely delivery | Value added services | Development of new products | Projects based concrete plant
